Requirements Report

(first draft)**8 March 2022**

1. Introduction

Our game will be a tower defense strategy game with the aim to prevent enemies from damaging our central core. We will have multiple towers with different attacking features allowing users to protect the center from the enemies. Players will try to keep enemy characters out of their territory as much as possible.

2. Details

2.1 Features of The Game

2.1.1 Core Features

- There will be obstructions placed by player that can damage enemy NPCs before they destroy the base
- The player placed obstructions will be:
 - Repairable
 - Upgradeable
 - Destroyable
- Enemies will be capable of traversing multiple paths
- Each wave will have a certain amount and types of enemies
- Certain levels will have a boss at the end
- Some sort of shop and in-game currency with which player will be able to purchase upgrades and repairs for his obstructions
- These in-game currency can be earned through defeating enemies, and completing waves
- Powerups:
 - Ice rescue (Slow down time if situation gets out of hand!)
 - Health potion (Heal towers in a particular region)
 - Airstrike (Attack enemies in a particular region)
 - Booming economy (Get double the amount of currency as usual for some time)
 - Tower Upgrade (Increase the health and the power of a tower.)

2.1.2 Non-Core Features:

- Obstacles like walls or fences that will make npcs decide to destroy and pass through or circumvent around the obstacle.
- A speed up or down button that determines the pace of the game such as spawn time of npcs, speed of npcs and towers, gold income by second etc. It basically speeds up or down the time in the game.
- An android version of the game may be released.

2.2 Similar Softwares

There are various kinds of tower defense games in the market. Some software that are similar to ours are: Clash of Clans, Bloons TD franchise, Kingdom Rush and Revenge of the Titans.

Revenge of the Titans: A tower defense game with similar features. This game also has some power ups such as “bezerk”, which gives 10 seconds of super power to your turrets, and “freeze”, which freezes all enemies for 10 seconds [1].

Clash of Clans: *Clash of Clans* tasks players to build their own village using the resources gained from attacking other player's villages. To attack, players train different kinds of troops using resources. One of the aims of the game is to build and upgrade defenses and traps that protect the player's village from other players' attacks

and to build and upgrade buildings. The logic of defending the base with the towers is similar to our game logic [2].

Bloons TD: Players attempt to prevent Bloons from reaching the end of a set course by placing towers or road items along it that can pop the bloons in a variety of ways. Tower, enemy and path use in the game is similar to the idea we thought in our game. [3].

2.3 Targeted Users

The software is targeted for the general audience. It is a simple game suitable for all ages. Our software does not contain any violence elements.

3. Summary & Conclusions

We are planning to create a basic tower defense game with various features like power ups, different levels and waves, armed towers to defend the base, basic AI NPCs, shop and purchasable items with in-game currency. It will provide strategic gameplay for video game enthusiasts.
